

Project Execution Risk Index

Composite score based on backlog, P80 cycle time, and workflow friction

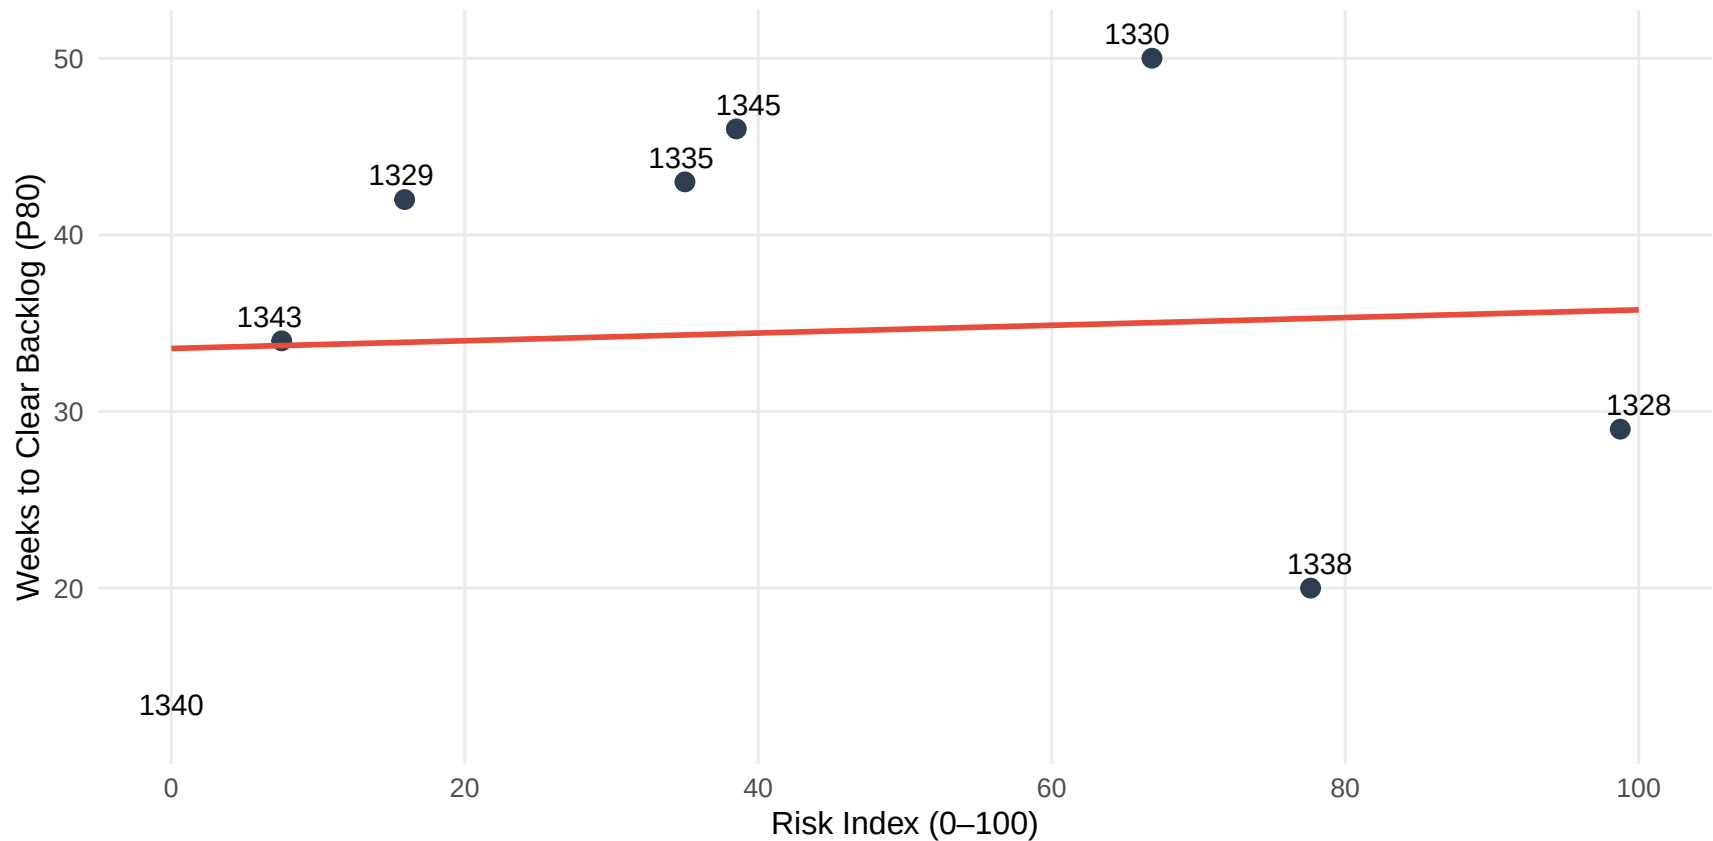

Top Project Risk Drivers — Project 1328

Raw metric levels behind the composite risk score

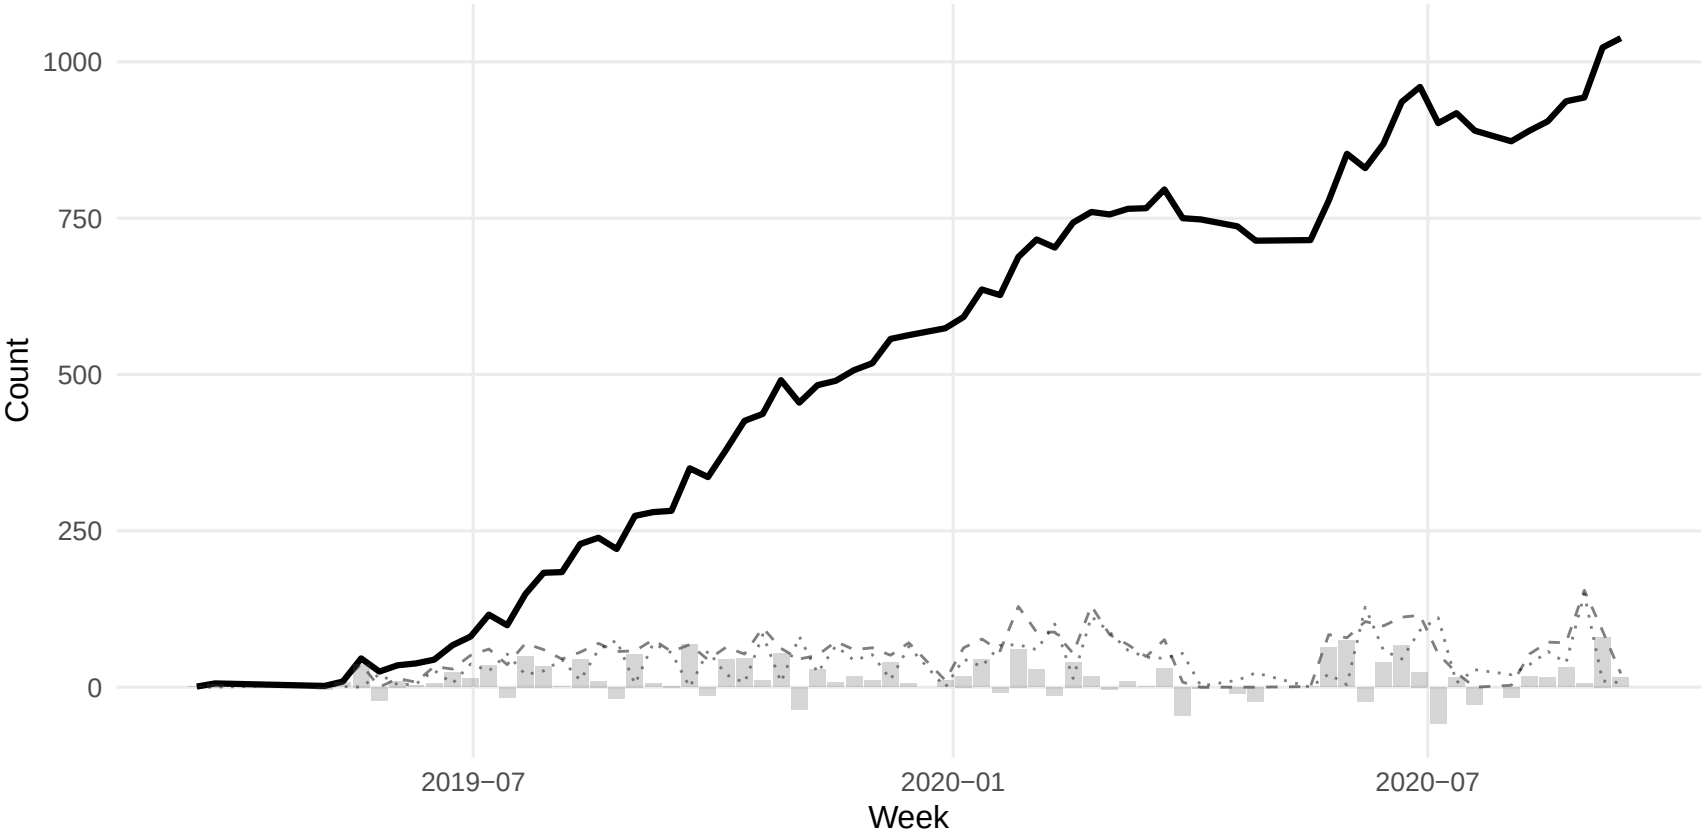

Risk Index vs Clearance Time (P80)

Each point represents a project (labels shown where space allows)

Backlog Trend and Weekly Flow: 1328

Line = backlog; bars = weekly net change (created – closed); dashed/dotted = created/closed volume

Monte Carlo Forecast: Weeks to Clear Backlog — Project 1328

Red region shows the risk tail (= P80). Use P80 as a conservative planning target.
